

Daisy Bag

#FG-BG-N-0014

The Daisy Bag is the ultimate in flexibility and modularity. Originally designed to carry a broken down M-4 Carbine as a discreet carry case for urban operation. It has become the best overall bag for vehicle operations. This bag can be set up as a medical kit for first responders, an active shooter bag for law enforcement and as emergency equipment bag for vehicle operators. Two of these bags can be quickly connected together with our optional long MOLLE accessory stick to form a hasty back pack or keep it as a pack and separate them if the situation requires it.
